

These documents are not intended to be a comprehensive review of prescribing information, but rather guideline reflecting our clinical practice.

Health care providers should, of course, provide patient care within their scope of practice; and review with their patients any current dosing information, contraindications or potential adverse events before recommending or prescribing medications.

Please see below for an overview of the Mayo Clinic Nicotine Dependence Center clinical practice:

**Treating Tobacco Dependence in a Medical Setting**

**Richard D. Hurt, Jon O. Ebbert, J. Taylor Hays, and David D. McFadden**

*CA Cancer J Clin 2009; 59;314-326; originally published online Aug 25 2009*
